

# **PROWL H<sub>2</sub>O**

h e r b i c i d e

## **Supplemental Labeling**

**FOR DISTRIBUTION AND USE ONLY WITHIN IDAHO**

EPA Reg. No. 241-418

EPA SLN No.: ID-060007

### **FOR WEED CONTROL IN CLOVER GROWN FOR SEED PRODUCTION**

This label is valid until December 31, 2015 or until otherwise amended, withdrawn, canceled or suspended.

Follow all applicable directions, restrictions, Worker Protection Standard requirements, and precautions on the EPA-registered product label for Prowl® H<sub>2</sub>O herbicide, EPA Reg. No. 241-418.

This labeling must be in the possession of the user at the time of application.

#### **DIRECTIONS FOR USE**

It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

Observe all cautions and limitations on this label and on the labels of products used in combination with Prowl H<sub>2</sub>O. Do not use Prowl H<sub>2</sub>O other than in accordance with the instructions set forth on this label. The use of Prowl H<sub>2</sub>O not consistent with this label may result in injury to crops. Keep containers closed to avoid spills and contamination.

Read the **Precautionary Statement, Environmental Hazards, Storage and Disposal,** and **Disclaimer** statements appearing on the container label.

#### **GENERAL INFORMATION**

Prowl H<sub>2</sub>O may be applied for pre-emergence weed control of most annual grasses and certain broadleaf weeds as they germinate, but it will not control established weeds. Unusually cold, excessively wet, or hot and dry conditions that delay germination or extend it over a long period of time may reduce weed control.

Refer to the Prowl H<sub>2</sub>O container label for a complete listing of weeds controlled.

#### **APPLICATION INSTRUCTIONS**

Some stunting and chlorosis of the clover may occur with postemergence applications.

Applications when clover exceeds 6 inches in height may result in poor weed control in the crop row due to possible reduced spray coverage to the soil.

Uniformly apply in 10 or more gallons of water per acre with ground equipment.

Apply Prowl H<sub>2</sub>O at optimum application timing for dodder or other weed control to established clover at a broadcast rate of 1.0 to 4.0 quarts per acre prior to weed emergence. Apply Prowl H<sub>2</sub>O before clover exceeds 6 inches in height.

#### **APPLICATION RATES**

Prowl H<sub>2</sub>O applied at a rate of 1.0 to 2.0 quarts per acre prior to weed emergence will control the following weeds:

<b>Grasses</b>	<b>Broadleaf Weeds</b>
Barnyardgrass	Carpetweed
Crabgrass	Florida Pusley
Crowfootgrass	Kochia
Foxtail, Giant	Lambsquarters
Foxtail, Green	Pigweed
Foxtail, Yellow	Purslane
Goosegrass	Spurge, annual
Johnsongrass (seedling)	
Panicum, Fall	
Panicum, Texas	
Sandbur, Field	
Signalgrass	
Witchgrass	

**Prowl® H<sub>2</sub>O herbicide** applied at a rate of 2.1 to 4.0 quarts per acre prior to weed emergence will control the following weeds in addition to those listed above:

Grasses	Broadleaf Weeds
Bluegrass (annual)	Chickweed (common)
Cupgrass, Woolly	Dodder*
Itchgrass	Fiddleneck
Junglerice	Henbit
Lovegrass	Knotweed
Millet, Wild-proso	Puncturevine
Panicum, Browntop	Rocket, London
Shattercane	Shepherdspurse
Sprangletop, Mexican	Smartweed, Pennsylvania
Sprangletop, Red	Velvetleaf (Buttonweed)

\* For optimum Dodder control, use 3.0 to 4.0 quarts per acre of **Prowl H<sub>2</sub>O**.

### RESTRICTIONS AND LIMITATIONS

**DO NOT** exceed 4.0 quarts of product per acre in any one crop season.

**DO NOT** apply this product through any type of irrigation system or by air.

**Prowl H<sub>2</sub>O** is most effective when mechanically incorporated, or when incorporated in the weed germination zone by rainfall or irrigation.

**DO NOT** apply to seedling clover.

**DO NOT** use on peat or muck soils.

**NOTE:** If loss of clover stand occurs due to adverse weather conditions, any crop registered for **Prowl H<sub>2</sub>O** preplant incorporated use can be replanted the same year into **Prowl H<sub>2</sub>O** treated soil (<1.5 quarts/acre) without adverse effects. If replanting is necessary, soil should not be reworked deeper than the **Prowl H<sub>2</sub>O** treated zone.

#### Special Crop Use Restrictions

Use of this product according to this labeling is deemed a non-food and as such is not for use on fields producing clover for livestock feed. **DO NOT** feed or graze clover following **Prowl H<sub>2</sub>O** application. **DO NOT** cut treated clover for hay or forage. **DO NOT** use harvested seed for sprouting. No portion of the treated field, including seed, seed screenings, hay forage or stubble may be used for human or animal feed.

Producers of clover seed who use this product, or cause the product to be used on a field they operate, are required to inform, in writing, conditioners receiving seed produced on fields treated with **Prowl H<sub>2</sub>O** herbicide. A copy of the labeling must be given by the producer to the conditioner. Processed seed must be labeled "Not for human or animal consumption" at the processing plant. All clover seed screenings must be disposed of in such a way that they cannot be distributed or used for food or feed.

### ROTATIONAL CROP RESTRICTIONS

The following crops may be planted after the indicated time interval depending on the crop and rate used.

Crop	Rate per Acre		
	Less than 1.5 quarts	1.6 to 3.0 quarts	3.1 to 4.0 quarts
Crops labeled for Preplant Incorporated Application	Same season	4 months	4 months
Wheat	4 months	12 months	18 months
Red beets, sugar beets and spinach	12 months	18 months	24 months
Other crops*	Following year	18 months	24 months

\*Barley may be planted 12 months after an application of up to 2.0 quarts per acre.

To avoid crop injury, land should be plowed using a moldboard plow when greater than 1.5 quarts per acre are used, or when rotating to sugar beets, red beets, or spinach at any use rate.
